+91 9898760222 | vrajdobariya.ict18@gmail.com | Surat , India | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)
AI/Data Enthusiast | Gold Medalist in Computer Science | GATE Top 15% - Competitive National Exam in CS

Domain/Functional Areas

- Recommender Systems
- Gen AI to Agentic AI
- Predictive Analysis
- Computer Vision

Key Skills

Programming Languages: Python, R, SQL, C, C++
Databases & Vector Stores: MySQL, MongoDB, ChromaDB(Vector Search)
AI/ML Frameworks & Libraries: Scikit-learn, XGBoost, PyTorch, TensorFlow, Keras, Statsmodels, SciPy (stats), Prophet, pmdarima, OpenCV, spaCy, NLTK, Transformers, Hugging Face, LangChain, LangGraph, FastAPI, Flask API, Streamlit, CUDA
MLOps & Deployment: Docker, Kubernetes, CI/CD Pipelines, AWS, Azure, MLflow, Linux, Unix-based OS, Git
AI/ML Expertise: Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, Generative AI, LLM, RAG, Agentic Workflows, Model Fine Tuning(Transfer Learning), Model Evaluation, Prompt Engineering, Reinforcement Learning
Data Science & Analytics: EDA(Numpy, Pandas, Matplotlib, Seaborn), Data Preprocessing, Feature Engineering, Hypothesis Testing, A/B Testing, Time Series Analysis, Forecasting, Big Data Technologies(Apache Spark, Hadoop), Data Visualization (Tableau, Power BI)
Core CS: Data Structures & Algorithms, Graph Analysis, Software Engineering (System Design, Testing, OOP), API Integration (REST, GraphQL), Agile Methodologies

Professional Experience

AtliQ Technologies Pvt. Ltd. **Vadodara, India**
AI/Data Intern (Remote) (Internship) Dec 2024 - May 2025

- Collaborated with a cross-functional team engaging stakeholders across healthcare and generative AI domains to align solutions with business goals, driving communication that expedited delivery and improved domain impact.
- Engineered an intelligent chatbot using RAG with LLaMA 3.3 and ChromaDB, increasing user engagement 60% and revenue potential 40%, integrating semantic routing and real-time SQL queries to optimize response times and experience.
- Built a hybrid BioBERT + Logistic Regression model for medical transcription, achieving 79.5% accuracy via SMOTE and SynonymAug, reduced manual effort by 50%, cut misclassifications by 25%, and ensured reliable, scalable EHR support.

Skills: BioBERT / Logistic Regression / SMOTE / RAG / LLaMA (LLMs) / ChromaDB / SQL / Semantic Routing / Teamwork

Accenture in India **Bengaluru, India**
Data Scientist (Full-Time) Jan 2022 - Jan 2024

- Collaborated with business stakeholders and cross-functional teams to identify analytical opportunities, translate requirements into scalable data science solutions, and drive data-informed decision-making to improve operational efficiency.
- Developed a Logistic Regression credit risk model, achieving 94% recall using SMOTE-Tomek and Optuna; reduced false negatives by 15%, generated scalable credit scores, and deployed a FastAPI service with Docker.
- Developed a Health Insurance Premium Prediction model using Linear Regression and XGBoost, achieving 15% error reduction using StandardScaler and Random Search Tuning, and deployed a FastAPI service with Docker, S3 bucket, AWS SageMaker and EC2.

Skills: Scikit-learn / XGBoost / Data Preprocessing / Feature Engineering / Fine Tuning / Model Deployment / A/B Testing / Teamwork

Projects

Intelligent Onboarding Agent Using MCP and LLM - Agents and Automation [Project Link](#)
[MCP / LLM Agents / Claude MCP Client / Tool Orchestration / Workflow Automation / Prompt Engineering] Mar 2026 - Jun 2026

- Engineered an intelligent onboarding agent leveraging Model Context Protocol (MCP) with Claude, enhancing HR productivity by approximately 55% and reducing onboarding turnaround by 45% through automated, context-aware employee workflows.
- Automated the complete onboarding lifecycle—registering employees in HRMS, sending welcome emails, notifying managers, raising equipment tickets, and scheduling meetings—using MCP tool orchestration, eliminating manual coordination significantly.

RAG-Driven Research Tool - Real Estate [Project Link](#)
[Langchain / HuggingFace / Transformers / ChromaDB / Streamlit / RAG / LLM / Prompt Engineering] Aug 2024 - Oct 2024

- Engineered a Streamlit-based web app with Retrieval-Augmented Generation (RAG), slashing LLM API costs by ~70% and research time by ~50% for real estate insights, delivering precise, URL-driven answers using LangChain's UnstructuredURLLoader tool.
- Spearheaded the integration of HuggingFace's all-MiniLM-L6-v2 embeddings and ChromaDB retrieval system, driving analytical efficiency and fostering teamwork to produce scalable, source-referenced outputs via Llama3 platform.

Education

California State University, East Bay **Hayward, USA**
Master of Science - Statistics Data Science Jan 2024 - May 2026
3.72/4.00

Adani University **Ahmedabad, India**
Bachelor of Technology - Information Technology Jun 2018 - May 2022
